Camunda

Berlin, Germany

Dear Hiring Team,

I am excited to apply for the software engineer, Full stack position at Camunda. Having recently completed my coursework for a diploma in Computer Science at Zetech University, I am eager to leverage my academic training and hands-on experience to contribute to your innovative team.

Throughout my studies, I focused on developing strong skills in networking (having successfully completed CCNA I, II, and III), Python, VB.net, JavaScript, web development, C, C++, java, cloud computing, UX and UI design through coursework and projects such as developing a virtual learning collaboration system built on django framework and react that allows users to engage in interactive collaborative learning. These experiences allowed me to enhance my problem-solving abilities and gain valuable insights into the software development lifecycle.

Camunda's commitment to delivering impactful tech solutions resonates strongly with me, and I am confident that my passion for learning and creating would align well with your goals.

I would welcome the opportunity to discuss how my skills and enthusiasm can support your team. I have uploaded my résumé for your review. I can be reached at +254707995754 or ngomiwesley@outlook.com and am available for an interview at your convenience.

Thank you for considering my application, and I look forward to the possibility of joining Camunda.

Sincerely,

Wesley Kamotho
